

Tamerica TW-2100 Wire Binding Machine

The Tamerica TW-2100 can punch and bind documents up to 14 inches allowing for legal size document wire binding. The open end throat design enables the punching of even larger size papers. The easy-to-use Tamerica TW-2100 wire binding machine is designed with several features to make your wire binding projects seamless. All die pins are fully disengageable for the occasional odd size binding projects. The 4-step punch depth control will allow your presentations to last longer with a stronger bind. A side margin control will ensure proper paper alignment. The wire hanger assists on the paper being loaded onto the wire binding element correctly. The wire closer, located on the back of the machine, has its own separate handle to ensure longevity of the die set and wire closer. The Tamerica TW-2100 Wire Binding Machine is a heavy duty all metal constructed wire binding system that includes a One Year Limited Manufacturers Warranty!
