

# DAHLE STACK CUTTERS

## PROFESSIONAL SERIES

Cutting multiple sheets of paper is easy work for a Dahle rolling trimmer or guillotine, but when you need to cut an entire stack, there's no better tool than a Dahle Stack Cutter. These industrial workhorses will give you the precision you need along with the safety you deserve. Each cutter has built in features that will increase the efficiency of your tasks as well as provide a safe and pleasurable cutting experience.

Dahle Professional Stack Cutters are manually operated but make easy cutting of up to 700 sheets of paper at a time. Safety shields can be found on either side of the cutting blade and will not allow the blade to move while they are in the up position. Once the shields are in place, you have the ability to cut

cleanly through 500 or 700 sheets of paper with very little effort. This clean, burr free cut through such a large stack of paper is made possible through a ground Solingen Steel blade and a paper clamp that places even pressure across the entire cutting surface. The spindle driven, self-locking backstop offers extreme accuracy and convenience for repetitive cutting. These cutters can be mounted on any secure table surface although the optional floor stands are recommended for proper cutting height and leverage.

Dahle Stack Cutters are manufactured in Germany and can be found in art departments, custom frame shops, and print & copy centers throughout the world.

### PROFESSIONAL SERIES

- ▶ 500 Sheet capacity / 17" cut length (846)  
700 Sheet capacity / 18 1/2" cut length (848)
- ▶ Easily cuts through large stacks of paper and card stock
